

Sahaja Agriculture Mission

Quotes on Sahaja Agriculture

Her Holiness

Shri Mataji Nirmala Devi

Founder, Sahaja Yoga Meditation

Excellent work done by Scientists of Rahuri Agriculture University – a Sunflower as big as 2 feet was produced through Sahaja Yoga vibrations (Sahaj Agriculture Methods) . It was reported that it had become difficult to even lift the flower due to its heaviness! It was also reported that wheat and sunflower production increased – almost doubled!

CD Pubic Programme Lucknow (UP) 1986

During Navratra (the nine days puja of Devi in Her nine forms) , Shakambari Devi enlightens the powers (of devotees) by blessing them with increased agricultural production. Their impact appears in agriculture – in the form of big sized vegetables – Brinjal, Tomato and cucumbers.

Gudi Padva Puja, 5th April 2000, Noida India

It is the duty of Sahaja Yogis to plant trees and create orchards. Sahaja Yogis can spread vibrations through their hands. When they (Sahaja Yogis) irrigate the fields – it brings about more prosperity, greenery and increased agricultural production.

Sankranti & importance of Suryadev dated 14.12.1996.

In Sahaja Yoga, you take the ordinary seeds and you vibrate them. If you vibrate them, then what happens that you start getting seeds which are even better than hybrid. I tried an experiment with a sunflower; so I developed a sunflower about 2 kilo weight, about one foot diameter and such big, big seeds, that you can't make them out to be sunflower seeds, so the collective was so amazed at it and they felt that this kind of seed will solve all of our oil problem.

Shri Ganesha Puja, Madrid, Spain, 6/11/87

If people are saintly they will be always protected by Mother Earth. She will always try to give them whatever they want. You can see in the minute way, that supposing now, in our Cabella here, the roses are of such a big size, such a big size roses, you won't find such big size in the whole world but we have here, such big ones. In Pratisthan we had flowers of sunflower so big as that. One man could not lift it. Now, how is it all this is happening in particular places? It is the Mother Earth who knows who is living here, who is walking on Her back we should say, or on Her soil, because Mother Earth understands vibrations.

Shri Adi Shakti Puja, Cabella, Italy, 25/5/97

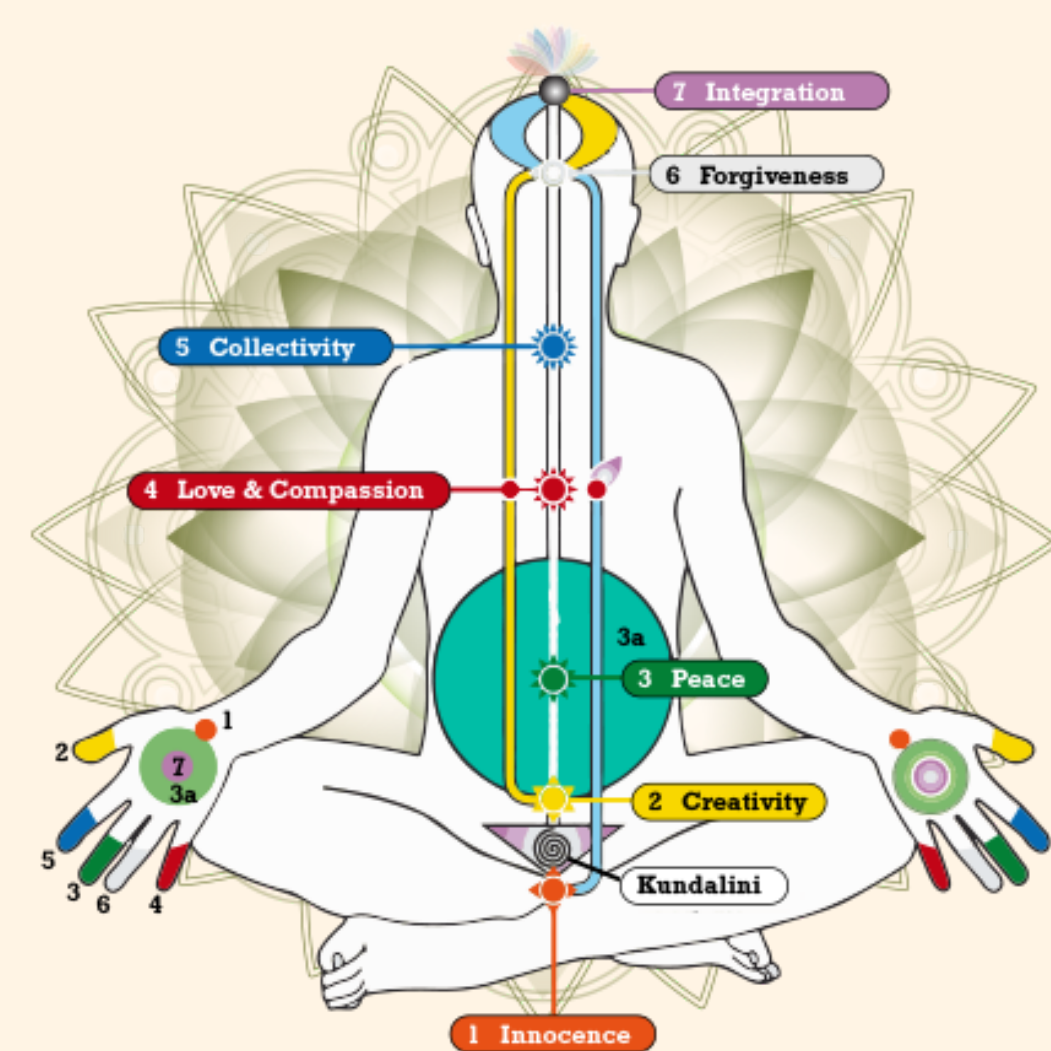

Sahaja Yoga has to be spread in villages more rather than in the cities. In the cities, it will spread automatically, Sahajee should spread Sahaja Yoga in villages so that the problems & sorrow of farmers can be solved. Even we can bring revolution by spreading Sahaja Yoga in rural areas.

Punya, Value system Gana (PUNE) 1988

Sahaja Yoga Centre Jaipur
(G.D Pareek, Joint Director Agriculture, Rajasthan Government)

Wheat Yield increased 20-25 % (2 years experimentation)

Scientific Research Studies on Sahaja Agriculture
Krishi Vigyan Kendra Dahigaon Ahmednagar (Maharashtra)

Guar Yield increased by 9.3 %

Scientific Research Studies on Sahaja Agriculture
Central Arid Horticulture Institute Bikaner (Rajasthan)

Increase in Oats Fodder yield by 20.61 %

Scientific Research Studies on Sahaja Agriculture
Mustard Research Station Bharatpur (Rajasthan)

Increase in Mustard yield by 12 %

Scientific Research studies on Sahaja Agriculture
Maharana Pratap Agriculture University & Technology Udaipur (Rajasthan)

Groundnut yield increased by 73 %

Scientific Research studies on Sahaja Agriculture
Crop Research Centre Gaghara - Ghat District Bahraich U.P Narendra Dev Agriculture University Faizabad U.P.

- Paddy yield increased by 29 %
- Wheat yield increased by 28 %
- Papaya 1.5 times big size, lustrous without any disease

Scientific Research Studies on Sahaja Agriculture
Mahatma Phule Agriculture Vidyapeeth, Pune

- Increased growth in plants 0 - 42.9 %
- Increase in germination 0 - 20.0 %
- Improvement in different product character 4 - 80 %
- Increased Yield of crops 14.7 - 50 %
- Improvement in body weight gain in birds
- Improvement in egg laying capacity

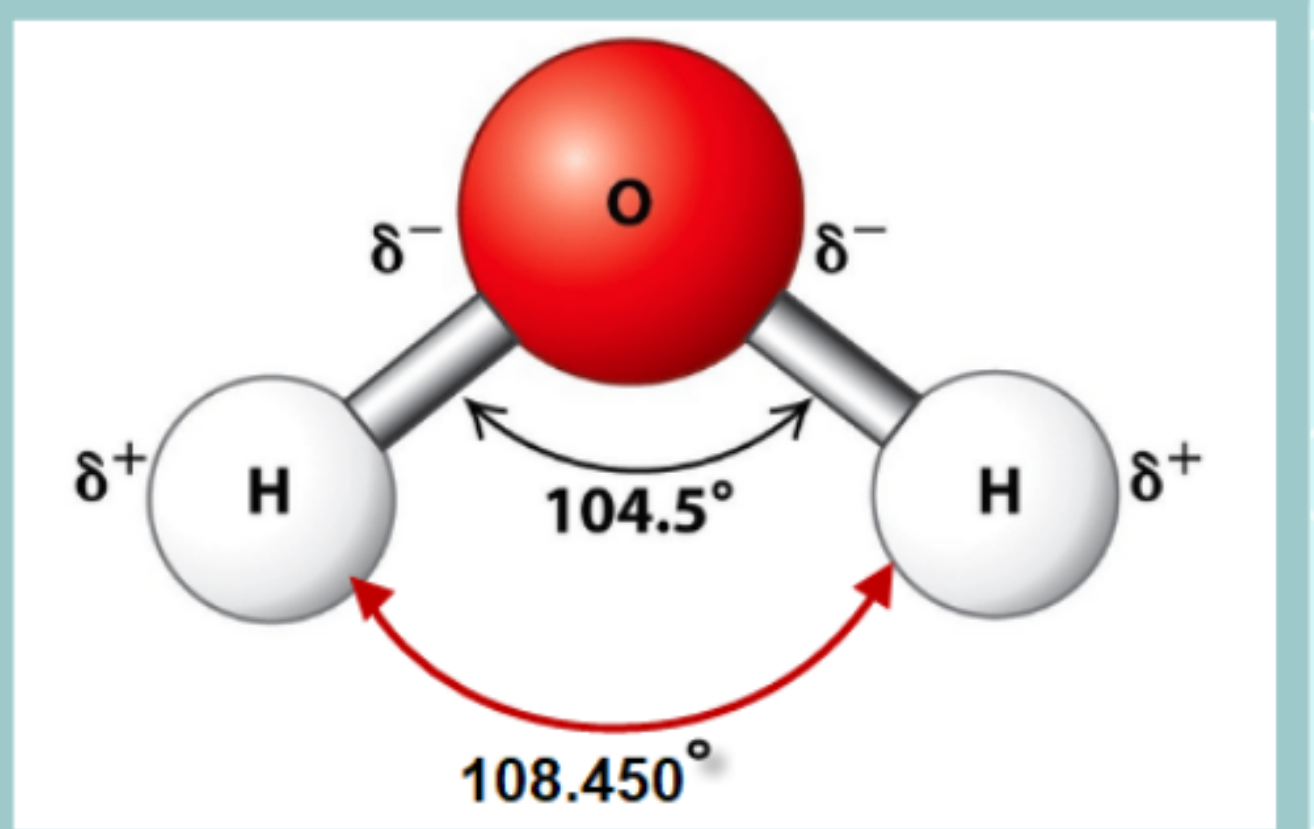

Scientific Research Studies on Sahaja Agriculture
Dr. Hymid Mylany Vienna, Austria, Europe

Increase body weight PIG about 15% gain

Scientific Research Studies done on Sahaja Agriculture
Dr Hymid Mylany Vienna, Austria, Europe

Change in water molecule structure from 104.5° to 108.45°

Scientific Research studies on Sahaja Agriculture
Govind Ballabh Pant University Of Agriculture And Technology, Pantnagar, Uttarakhand

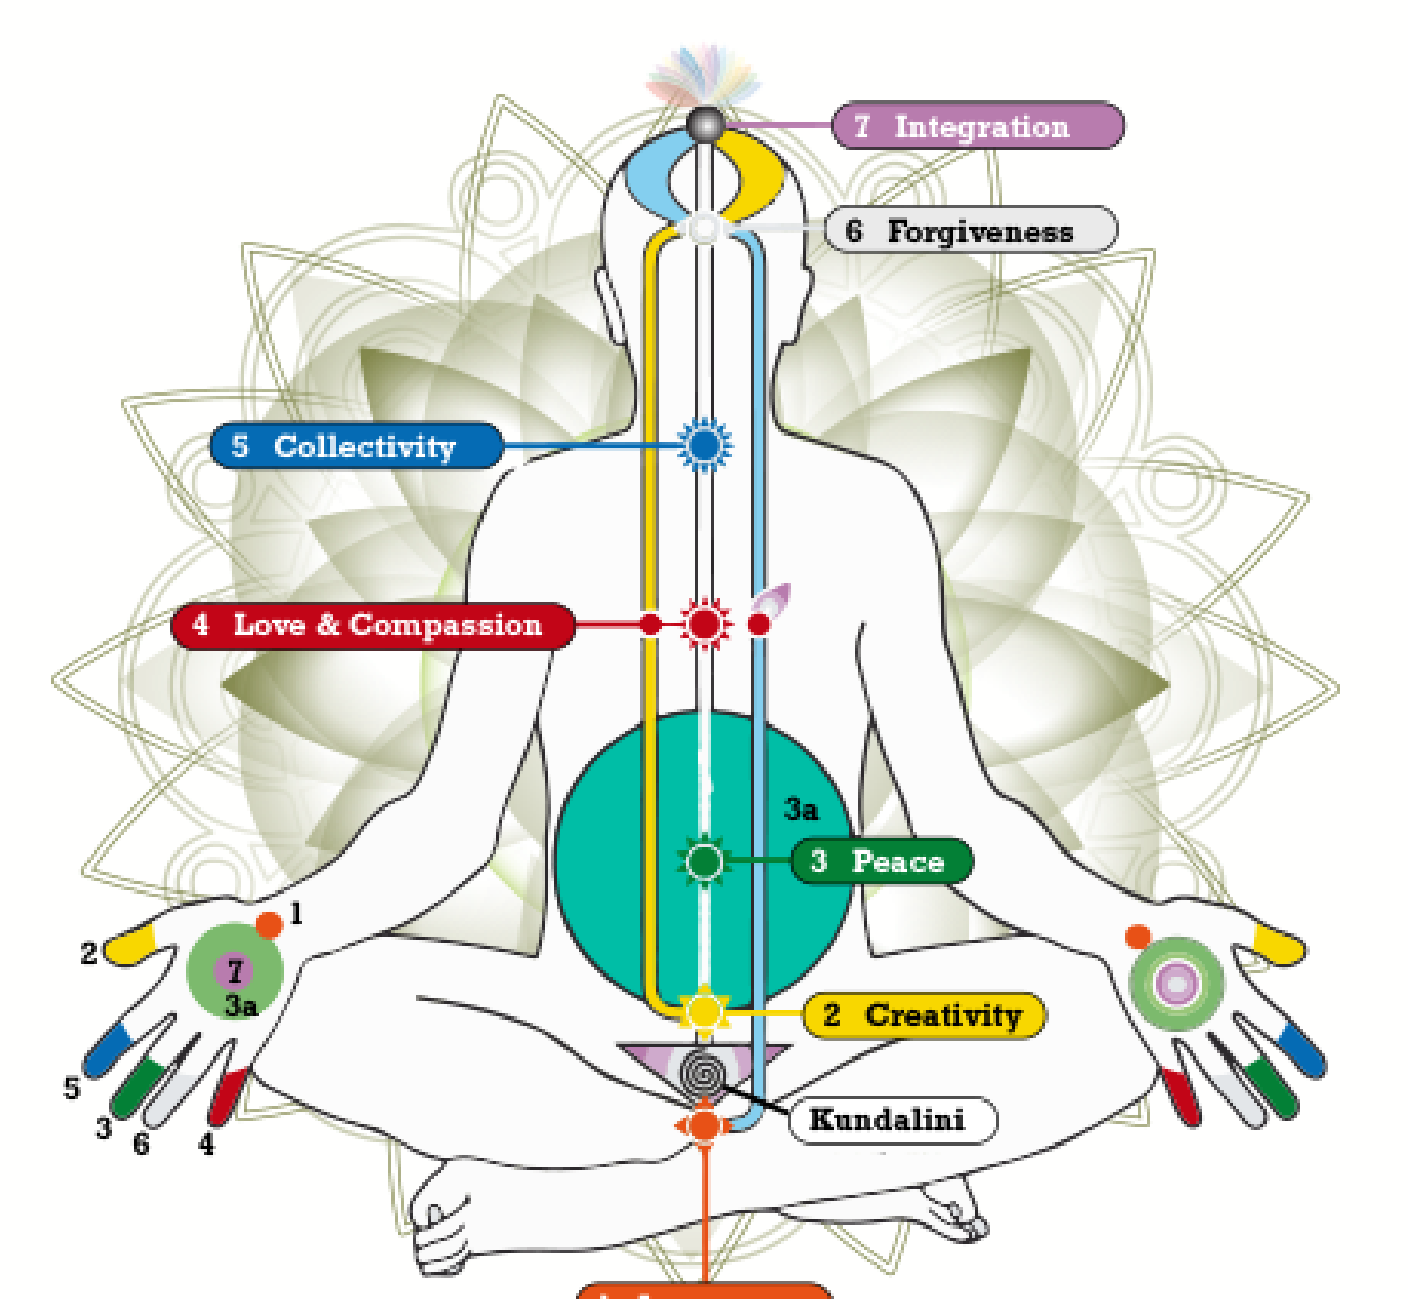

- The gourd is 2.5 to 3 feet long while the control is 1.5 feet long.
- Tomato yields
- Attractive, enchanting large size flowers yield

Learn Sahaja Yoga Meditation

Success Stories of Sahaja Yogi Farmers

Success Stories of Sahaja Yogi Farmers

Mr. Tarun Choudhary Gautam
Buddhanagar, Girirajpur
Greater Noida (Rauri)
Mob. 8010006864

Result -
Gourd weight 1-1.5 kg,
Pumpkin 2.5 to 4 kg,
Large sized, Stain Free
Lemons

Success Stories of Sahaja Yogi Farmers

Mr. Sandeep Deshmukh
Sangli honored with
Maharashtra Krishi
Bhushan Award 2018
Mo:9665946189

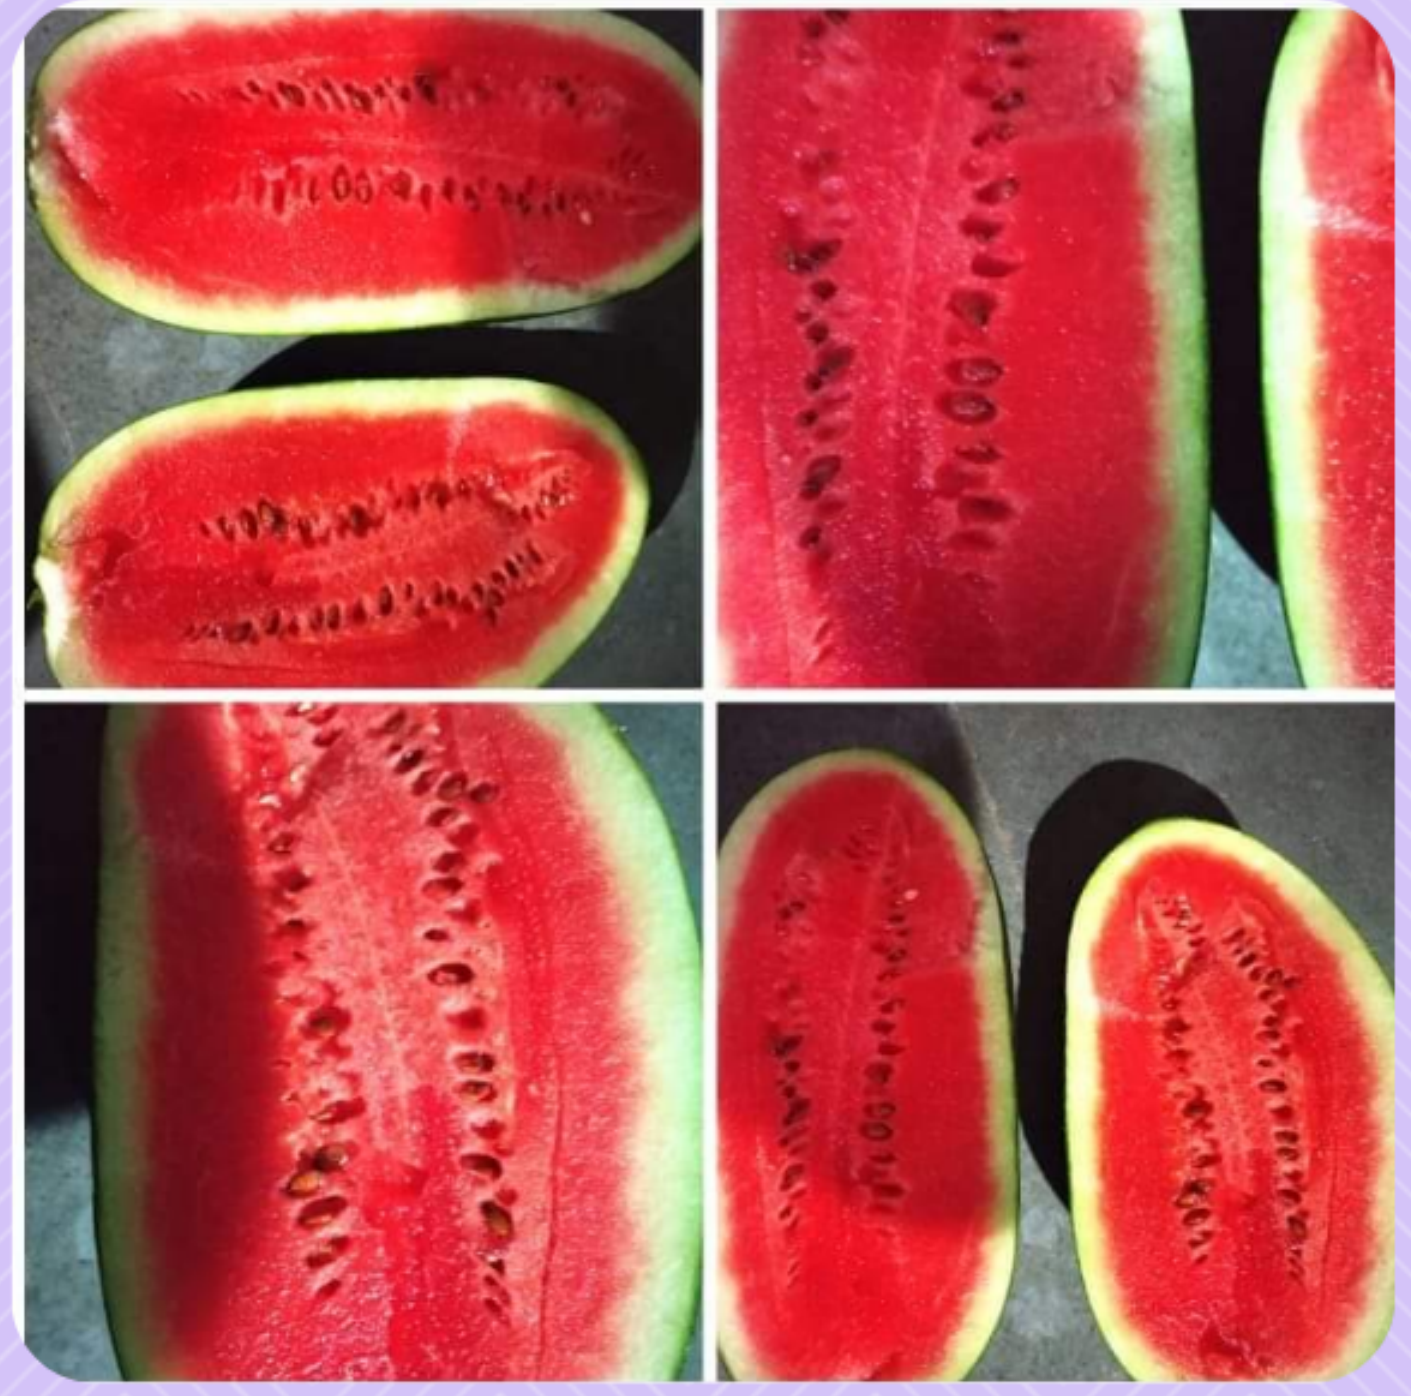

Result -
One pomegranate weighs
from 800 grams to 1 kg by
Sahaja farming methods.

Success Stories of Sahaja Yogi Farmers

Shri Bharat Kumar Patel
Palanpur, Gujarat

Result
Increase in
watermelon yield

Success Stories of Sahaja Yogi Farmers

Shri Naresh Sahu Chhawda
District Baran, Rajasthan
Mob. 9079238021

Result
Better production of
Cabbage and Garlic

Success Stories of Sahaja Yogi Farmers

Shri Samalbhai Patel
Palanpur
Mob.9429088269

Result
More production of
vegetables (potatoes,
cauliflower, cucurbits),
5 kg cauliflower

Success Stories of Sahaja Yogi Farmers

Captain Rajesh Kumar Sahu
Machalal District, Badayu
Uttar Pradesh

Result
High yield of sugarcane
70-80 tonnes per acre
(length approx 20 feet)

Success Stories of Sahaja Yogi Farmers

Mr. Punjab Rao Bihade
Akola, Maharashtra
Mo.9552273001

Result-
Better yield of Arhar & gram
(Arhar 10 quintal / acre &
Gram 14 quintal / acre)

Success Stories of Sahaja Yogi Farmers

Shri Samalbhai Patel
Palanpur
Mob.9429088269

Result
More production of
vegetables (potatoes,
cauliflower, cucurbits),
5 kg cauliflower

Success Stories of Sahaja Yogi Farmers

Sri Tanka Gautam
Chitwan, Nepal

Result
Greater disease free
papaya production

Result of Sahaj Agriculture on Crops

Shri C.Mohan Palkhad
Kerala
Mob. 9447839465

Result -
Adopted Sahaja Agriculture
technique in 600 acres of
land. Achieved increased
production and income .

Success Stories of Sahaja Yogi Farmers

Mr. Tarun Choudhary Gautam
Buddhanagar, Girirajpur
Greater Noida (Rauri)
Mob. 8010006864

Success Stories of Sahaja Yogi Farmers

Excellence Award to
Sahaj Krishi by Vice
Chancellor, Agricultural
University - Ajmer, ICAR
New Delhi, Krishi Upaj
Mandi, Ujjain, Shetkari
Mela Ahmednagar,
Orissa and Government
of Maharashtra.

Sahaja Agriculture Technique

4 Simple Steps

Learn Sahaja Yoga Meditation

1

Sahaja Yogis teach farmers about Sahaja Yoga meditation regularly & free of cost

Vibrate seeds, water, coconuts overnight in front of Shri Mataji

2

www.sahajkrishi.org

3

Bhoomi Pujan & Havan

Planting of vibrated seeds and using vibrated water for irrigation.

4

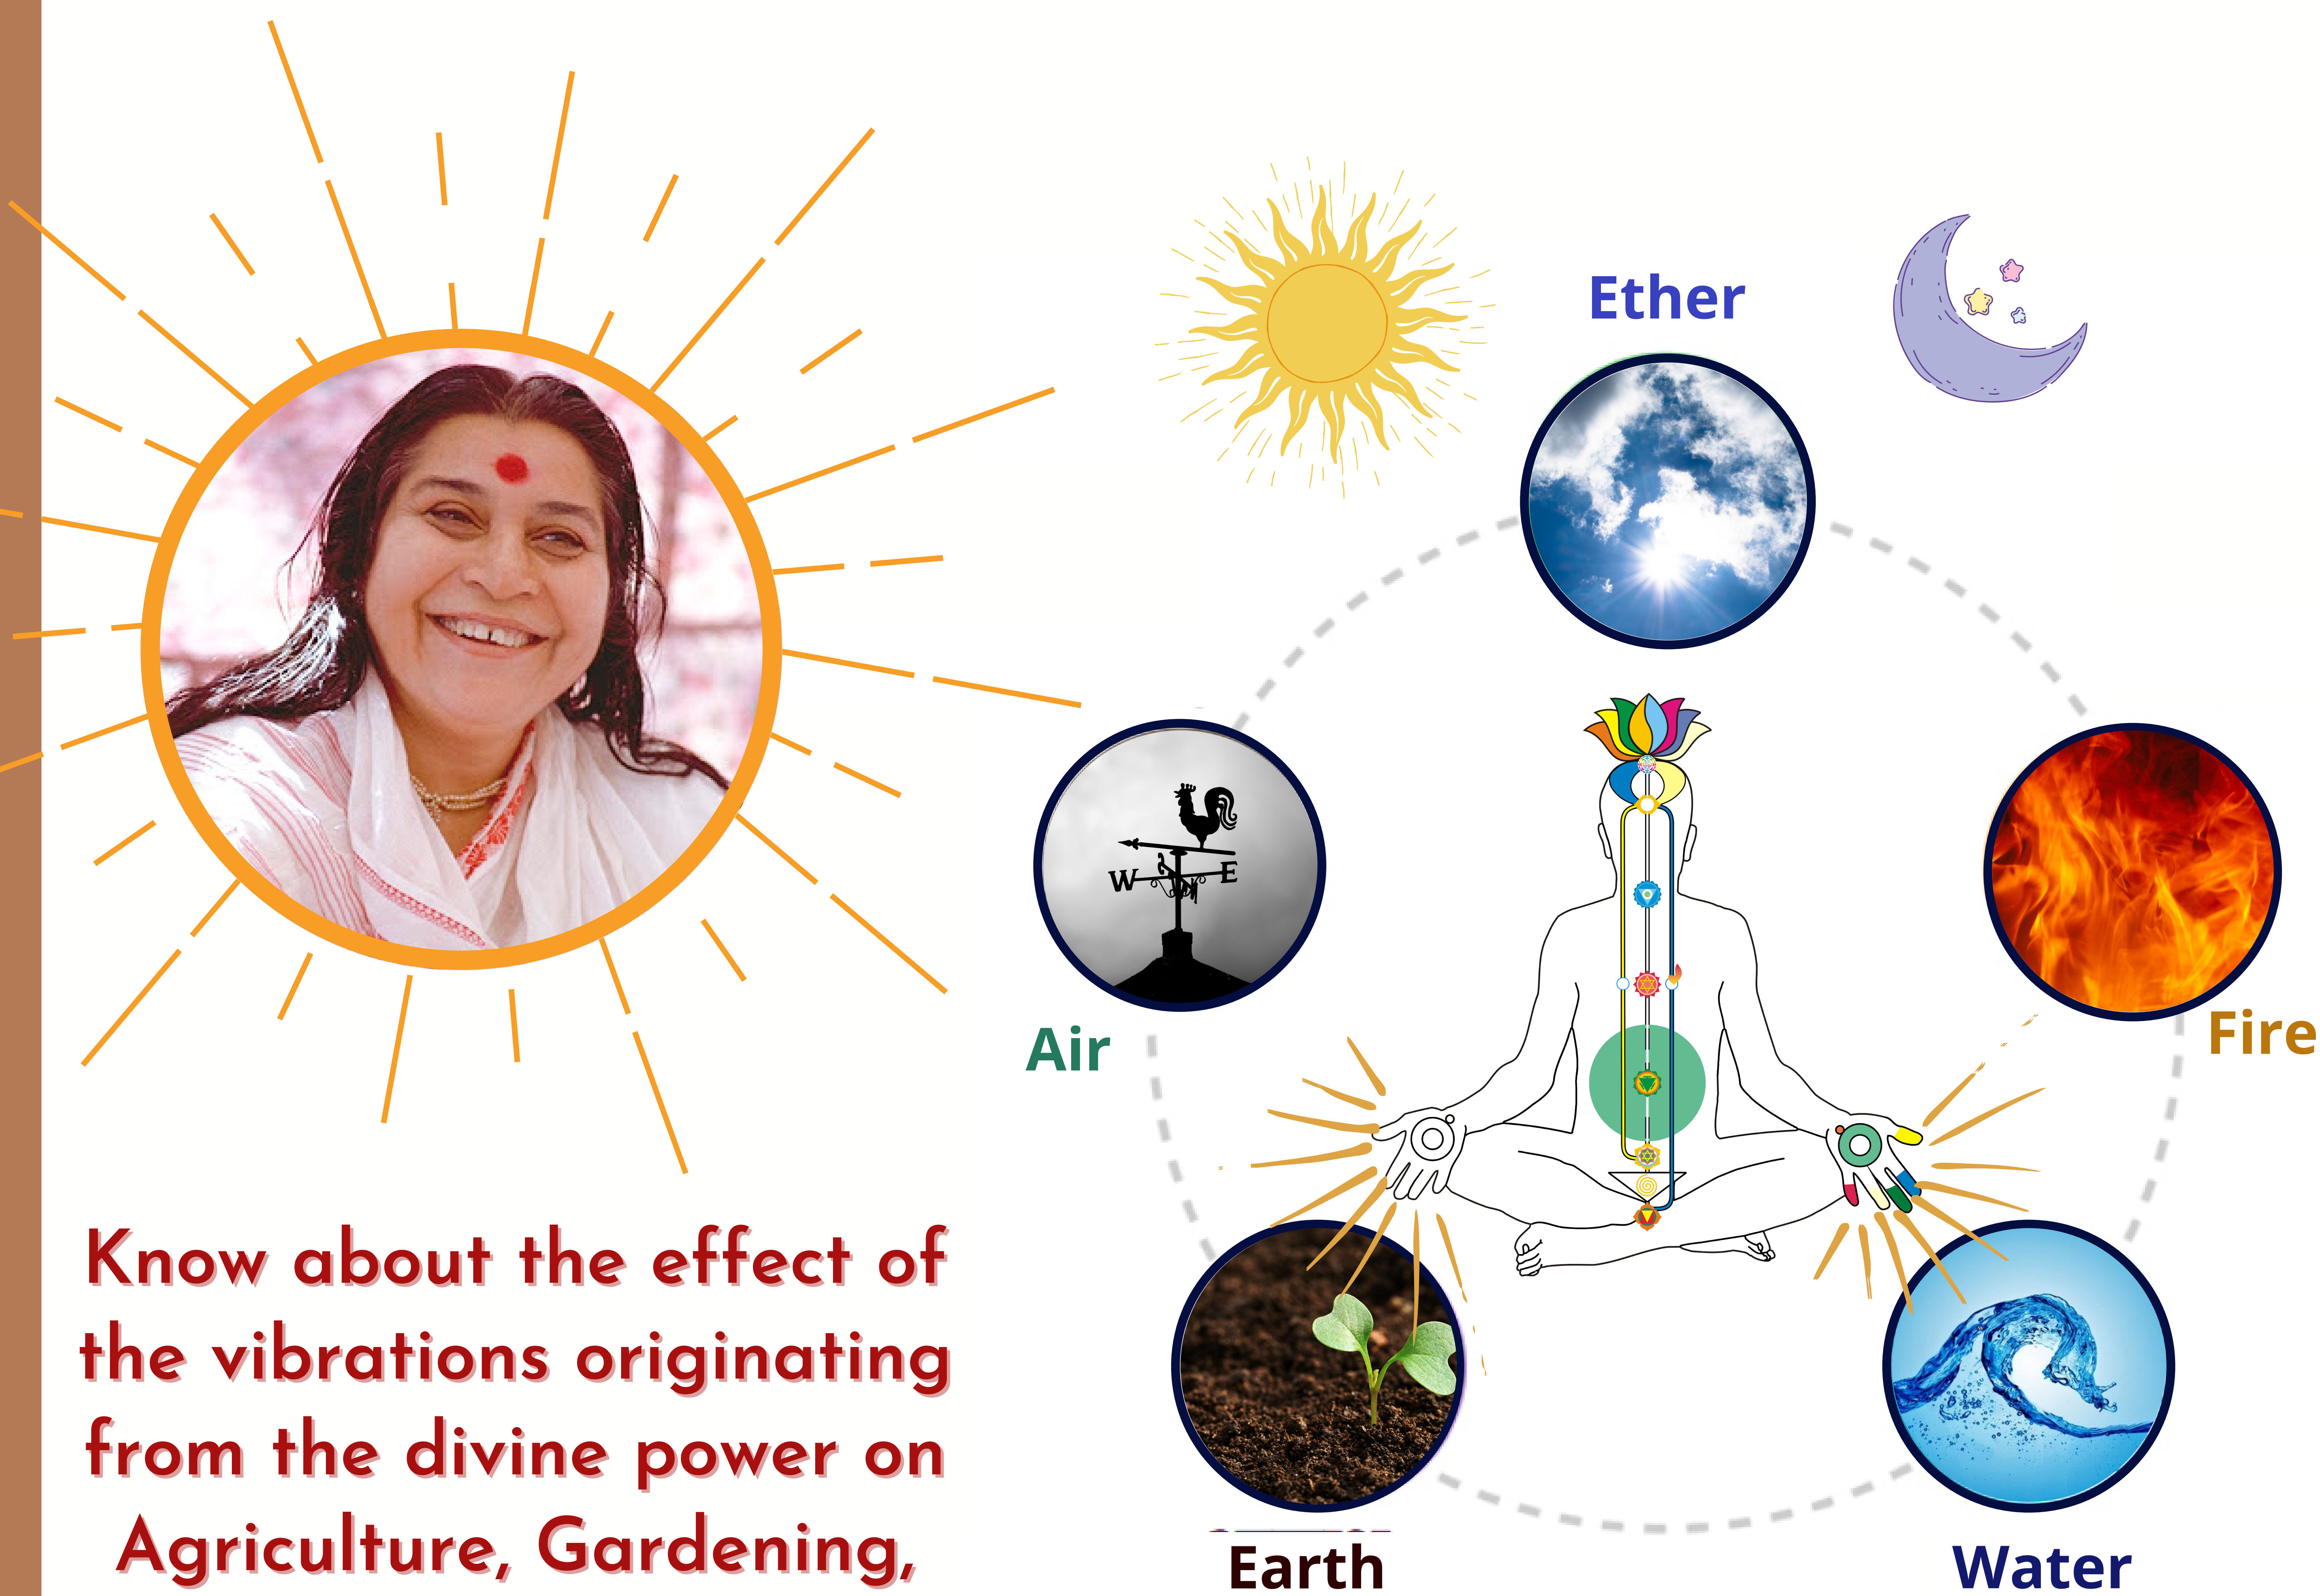

Regularly nourish the growing crops with divine vibrations

Benefits of Sahaja Agriculture

- Increased production of food grain
- Improved growth of plants/ development
- Protection from natural calamities
- Improvement in the quality of animal food
- Improvement in the health of animals
- Improved Immunity
- Increase in Milk Production

Know about the effect of the vibrations originating from the divine power on Agriculture, Gardening, Cottage industry and Animal Husbandry
